## Experience

---

### CharterHouse Detective

Autumn Internship 2023 He enthusiastically participated in all the assigned tasks and demonstrated his admirable work ethics, research, and leadership skills. We at Charter House have been delighted to have him as our Cloud Engineer Intern. We thank him for helping us make changes happen. We wish him all the best for his future

### Oasis Infobyte Web Development and Designing

A passionate Frontend Developer Intern with a drive to create exceptional user experiences through the use of HTML, CSS, and JavaScript. Seeking a position to leverage strong technical and problem-solving skills and extensive web development knowledge to achieve organizational efficiency, reduce page load speeds, and optimize user interfaces. A passionate Frontend Developer Intern with a drive to create exceptional user experiences through the use of HTML, CSS, and JavaScript. Seeking a position to leverage strong technical and problem-solving skills and extensive web development knowledge to achieve organizational efficiency, reduce page load speeds, and optimize user interfaces..

### Internet of Things (IoT) SNTI,

I initially received training on how to work with multiple sensors, how to calibrate them, and then program them using Arduino. By the end of the internship, I had worked on multiple Smart Home and Smart Water/Electricity Meter Projects.

## Projects

---

### IOT-Based cold management chain

IoT will drive the future of cold chain logistics. IoT-enabled cold chain monitoring is to use mobile communication technology, GPS positioning technology, temperature and humidity sensing technology, network technology, database technology, etc. to realize the remote monitoring of temperature and humidity as well as the positioning of goods and transport vehicles in supply chain logistics. Data collected by sensors and aggregated by IoT gateways will be sent to the cloud platforms of cold chain services for further analysis and management..Such cold chain IoT solutions will help accomplish the visualization of cold chain logistics and the tracking of items

### Fake News Detection

In this systematic literature review, the supervised machine learning classifiers are discussed that requires the labeled data for training. Labeled data is not easily available that can be used for training the classifiers for detecting the fake news. In future a research can be on the use of the unsupervised machine learning classifiers for the detection of fake news.

## Education

---

Sinhgad Academy of Engineering June'2024

BE- Electronics and Telecommunication Engineering | CGPA: 8.05

Sau. Venutai Chava polytechnic

Diploma- computer science | 84.11 %

## Tech Skills

---

**Languages:** C/C++, Java /OOP/DSA

**Technologies:** HTML, CSS ,JS, React.js

**OS:** Windows, MAC, Linux/unix

## *Certificate*

---

**IBM:** Cyber Security Tutorial | Cyber Security Training For Beginners | Cyber Security | Simplilearn.

**OmniActive:** For completing the Entrepreneurship Training organised as part of Building India INC

### *Soft Skills*

- 
- Curious and keen to learn new technologies .
  - Adaptability: Quickly learned new software tools during an internship, which improved team productivity.

### *Extra-curricular*

- 
- 3 Times best player in State level college University Tournament.
  - 3 times best batsman in University Tournament.
  - 2 times best bowler in University Tournament.
